2.IDEATION PHASE

ProblemStatement:

Managing a school or college involves lot of complex tasks-from keeping track of students and teachers to handling admissions and checking student performance. Doing all this manually can be time-consuming and lead to mistakes.

That's why there's a need for and Educational Management System, a smart, all-in-one platform that helps schools and colleges run more smoothly. It takes care of routine admin work, keeps student and teacher information organized, makes the admission process easier, and even helpsntrack how students are doing in their studies.
